Cologne

The location: Haus Humboldtstein

The vicinity: Drachenfels and Siebengebirge

Learning...

One of Europe's most renowned radar institutes Fraunhofer FHR cordially invites you to join us for our International Summer School on Radar / SAR. We offer the unique opportunity to gain an in-depth education on radar and synthetic aperture radar (SAR) techniques by distinguished international lecturers. Our programme covers a wide range from radar fundamentals to state-of-the-art Radar / SAR systems to sophisticated signal processing techniques and their applications.

... and Enjoyment!

As a student of the Int. Summer School on Radar / SAR you are welcome to a stimulating academic environment in a vibrant atmosphere among international radar specialists and experts (approx. 40 students). Our intellectually rewarding courses and workshops, which will manifest the theory of the lectures, are accompanied by excursions as well as cultural and social events, introducing you to UNESCO's World Heritage, the Upper Middle Rhine Valley by a bicycle tour and to the vibrant city of Cologne.
